

Global Access Program - Country List

Working hand in hand to enable sustainable access to world-class diagnostics for the people who need them, when they need them – no matter where they live.

Recognising that diagnostics is an integral component for functioning health systems, in 2014 Roche launched the Global Access Program to enable access to reliable testing solutions for patients in low- and low-middle income countries (LMICs). Since its inception, the Global Access Program has expanded substantially to provide increased access to diagnostics at affordable pricing for resource-constrained countries.

Our goal is to use innovative solutions and leverage world-class expertise to establish diagnostics as a frontline defence against diseases such as HIV/AIDS, Tuberculosis (TB), Hepatitis B and C (HBV and HCV), COVID-19 and Human Papillomavirus (HPV)/ Cervical cancer.

It is part of Roche's commitment to improving sustainable access to quality healthcare solutions by the people who need them, when they need them – no matter where they live.

Eligible Countries

Asia Pacific

Afghanistan	Micronesia	Sri Lanka
Bangladesh	Myanmar	Timor-Leste
