

Global Access Program Providing innovative diagnostics solutions to those who need it most

Universal access to quality healthcare and medical innovation remains a global challenge.

As a community we have an ambitious goal: to stop as many diseases as possible.

Roche continues to partner with national governments, local healthcare facilities, communities and international agencies to go beyond providing diagnostics tests.

The Roche Global Access Program provides access to diagnostics for HIV, hepatitis, tuberculosis and cervical cancer in high disease burden and qualified countries where reliable diagnostic solutions are needed most.

Global Access Program Timeline

2014 Announced Global Access Program for HIV viral load testing

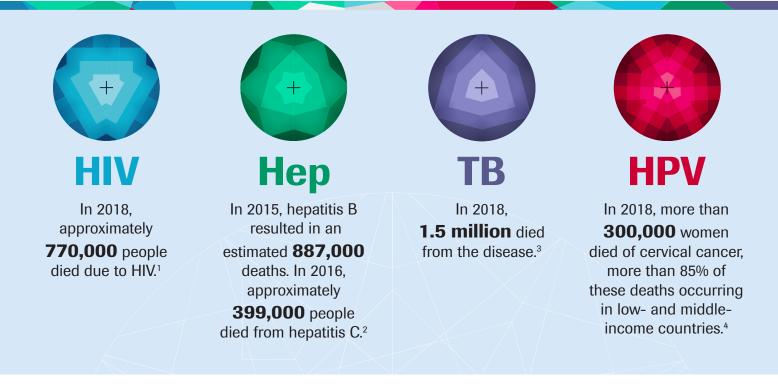

2018 Launch of **cobas**[®] Plasma Separation Card to simplify sample collection and transportation and increase access to HIV monitoring testing

2016-2017

Expansion to include Early Infant Diagnosis and additional **cobas**[®] Systems family

2019 Expansion of the Global Access Program to include access to diagnostics for tuberculosis, hepatitis, and cervical cancer

DISEASE PREVALENCE: DEATHS

DISEASE ELIMINATION GOALS

HIV goals by 2030⁵

of people living with HIV will know their HIV status

of people who know their status receive treatment

of treatment on HIV treatment have a suppressed viral load

Hepatitis goals by 2030°

reduction in new cases of chronic hepatitis B and C

reduction in hepatitis B and C

of treatment eligible persons with chronic hepatitis B and C infections

TB goals by 2030⁷

reduction in the absolute number of TB deaths

reduction in the TB incidence rate

of TB-affected households experiencing catastrophic costs due to TB

Cervical cancer goals by 2030[®]

of girls fully vaccinated with HPV vaccine by 15 years of age

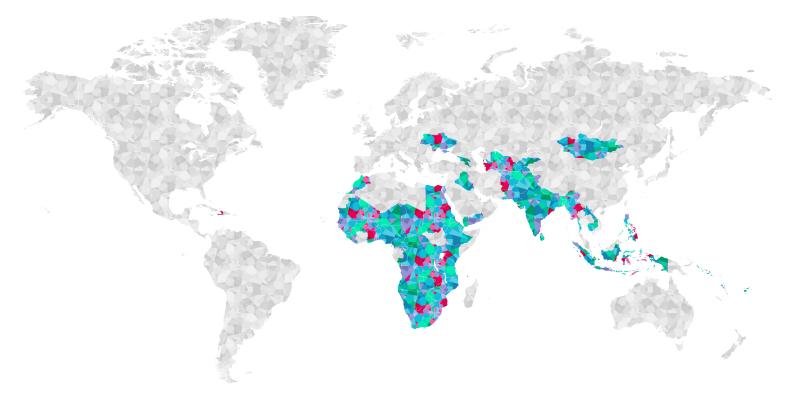

of women HPV screened at 35 and 45 years of age and all managed appropriately

of women identified with cervical disease receive treatment for precancerous lesions or invasive cancer

COUNTRIES WITH GLOBAL ACCESS PROGRAM

The program provides increased access to diagnostics at affordable pricing for qualifying organizations in 82 eligible countries with the highest disease burden.
