

The **cobas**[®] 6800 and 8800 System 2.0 Update^{*}

Coming early 2025

Designed for flexibility on your terms – without compromise

The pandemic may have eased, but its impact remains.

Unforeseen challenges of the pandemic have pushed many laboratories, like yours, to evolve and seek solutions that can help meet new demands.

Labs modified their approaches to cope with these challenges:

Rising costs

Higher volumes

Staffing

Shifting testing needs

Larger menus

A common theme emerged, revealing a greater demand for:

Flexibility

Consolidation

Ease of use

When our customers spoke, we listened.

To achieve their goals for today and tomorrow, laboratories need:

More testing flexibility without the common drawbacks that could hinder a lab's growth.

That's why we are evolving our solutions to give you the flexibility you want without the trade-offs you don't.

^{*} The cobas[®] 6800/8800 System 2.0 Update is in development and not available.

Introducing the **cobas® 6800 and 8800 System 2.0 Update:** Designed for flexibility on your terms – without compromise.

The **cobas® 6800 and 8800 System 2.0 Update** is an intelligent system being designed with the proven reliability our instruments are known for and features that provide flexibility according to your lab's unique needs. Design goals focus on four key areas:

More variety of tests per run

Keep up with high-volume demands and maximise throughput with a broader assay menu per run

User-controlled prioritisation

Influence TATs for high-priority tests and samples to meet your lab's needs

Intelligent scheduling

Rely on your system to always determine the most efficient combination of tests as it adjusts to your own priorities

Flexible QC management

Set your own rules to run QC at optimal intervals to maximise throughput and minimise costs

Additional enhancements

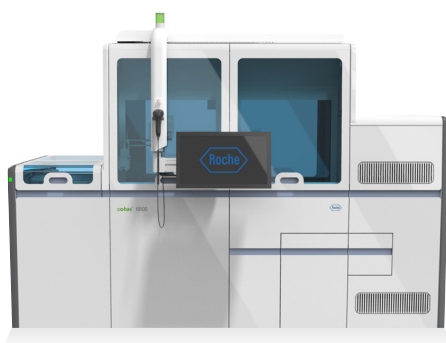

Alignment with **cobas® 5800 System**

Reduce training and inventory overhead and increase flexibility in your lab with common reagents, technology, and software experience and workflows.

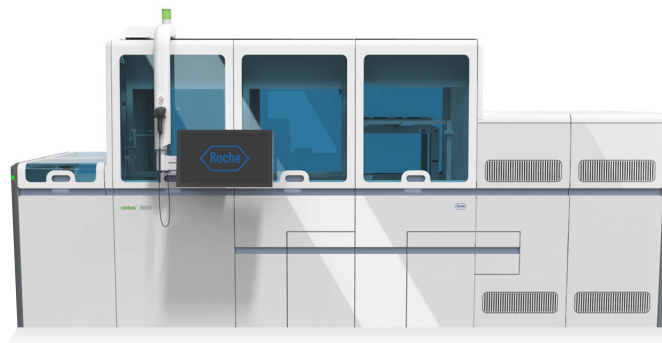

Maximised resilience

Continue testing and reduce non-productive time as system exceptions are resolved with improved system checks, convenient maintenance, and fast support.

The System 2.0 Update is proof of our ongoing commitment to innovation within our platforms.

cobas® 6800 System

cobas® 8800 System

**Experience a new level of confidence and freedom with
a system that understands your lab as well as you do.**
