Provide **genetic counseling** for your patients

For your patients who are considering or have taken the Harmony® Prenatal Test, expert genetic counseling is available through GeneMatters, an independent telehealth genetic counseling service.

GeneMatters' genetic counselors are board-certified and licensed with an average of 13 years of experience, providing you the reassurance that your patients will receive the guidance they need for informed decision-making.

---

**What your patient receives**

A GeneMatters' genetic counselor will call your patient at the time of the appointment. During the approximately 30-minute counseling session, the genetic counselor will help your patient:

- Understand risk based on family history
- Decide if testing is right for them
- Understand genetic test results
- Make informed healthcare decisions

---

**How to get started**

**Step 1:** To initiate pre- or post-test genetic counseling, complete the referral form and obtain patient signature for consent.

**Step 2:** Fax the following to GeneMatters at 612-808-5186
- Signed referral form with patient consent
- Harmony® Prenatal Test results (if available)
- Ultrasound reports (if available)

**Step 3:** GeneMatters will contact patient to schedule the appointment (within 24 hours of referral) and will call patient at time of appointment to deliver genetic counseling.

**Step 4:** GeneMatters will provide a summary of the discussion to both the referring physician and the patient, within 24 hours after the appointment.

---

**GeneMatters** is an independent telehealth genetic counseling service. Our mission is to improve access to genetic counselors through telehealth. Learn more at Gene-Matters.com.

---

**This service is provided compliments of Roche, at no additional charge.**
