

The LOINC® codes provided in this document are Roche's best estimate of the LOINC codes that should be associated with each of our reagents. To our knowledge, the codes provided are accurate and reflect a correct LOINC association. However, we are providing LOINC codes for informational use only.

Please note that Roche does not create or manage LOINC coding assignments. LOINC codes are created and managed by the Regenstrief Institute, Inc. ("Regenstrief"). Roche cooperates with Regenstrief when asked about unique markers and conducts periodic method reviews to determine whether new LOINC codes should be created for unique markers or markers not properly characterized by existing codes. However, the development, assignment, and management of LOINC codes remains solely within the purview of Regenstrief. With respect to certain tests, there may be multiple LOINC codes that could apply. You must determine the most appropriate code for your test catalog based on specimen type, challenge, and timing.

Roche makes no representation and/or warranty with respect to the provision of LOINC codes, including but not limited to the suitability of use to which you intend to put them. Roche further disclaims any and all liability associated with your decision to rely upon the LOINC codes provided herein. You, as a testing laboratory, remain solely responsible for ensuring the accurate selection of LOINC codes and the accurate mapping of LOINC codes within your laboratory information system.

Please direct any questions about the information in this document to Roche Customer Support Center at 1-800-428-4674.
