cobas® infinity laboratory solution

Create a Masking Profile

1. For this example it is important to make sure we are in **Lab Flow**
2. Once logged into cobas infinity, select the **Administration** tab
3. Click on **Menu**
4. Navigate to **Workflow**
5. Select **Masking profile definition**
6. Click on **Create profile** in bottom left of the screen to edit

All fields marked with an asterisk (*) indicate required information

7. Enter the **Profile name** and optionally, enter a **Description**
8. Use the drop-down menu to enter the **Location**
9. Determine which instruments to select utilizing the arrow button to add to **Instrument selection.** Alternatively, to see all available instruments, choose the **All instruments** option
10. In the **Tests** group box, choose the test and the instrument in which you want to mask the test. Also, to mask the same test in all instruments, choose the test, and then choose the button
11. In the **Targets** group box, choose the target you want to include in the profile.
12. Choose the **Save** button
