# cobas® infinity laboratory solution

# General Search Capabilities

You can search for patients and orders from the main screen without needing to access the corresponding submenus.

1.  From the working space, choose the **Search** tab

2.  Click on **Menu** to view the following options
    - Patient search: search for a given patient in the software
    - Order search: search for a given order in the software
    - Patient history: search for orders and tests associated with a given patient
    - Order traces: check the actions performed on a given order or on all the orders of a given patient
    - Sent/received: search for samples already sent or pending to be sent to health centers, as well as sample results received by health centers
