

UP FRONT QUALITY CHECKS

Other systems **make you check—and double check—samples**

- **MANUAL SAMPLE CHECKING REDUCES PRODUCTIVITY**
Diverts attention from clinical tasks, increases risk of bad sample oversight
- **INADEQUATE SAMPLE VOLUME**
Need patient to return to lab for a re-stick; need laboratorian to re-order test
- **UNUSABLE SAMPLE**
Need patient to provide another sample; requires specimen to be rerun/retested, wasting critical time
- **CLOT BRINGS ENTIRE SYSTEM DOWN**
Unplanned downtime results in lost revenue, wasted spending, outsourcing of tests, diminished lab quality, and high stress

The **cobas 8100** automated workflow series **ensures sample quality**

- **CONFIRMS SAMPLE VOLUME AND QUALITY**
Removes these high-touch, manual steps to multiply your productivity
- **IDENTIFY ERRORS EARLIER, INTERVENE EARLIER**
Maintain quality standards at every point. Guard against:
 - Mislabeled specimens
 - Low sample volume
 - Poor sample quality
 - Clotted specimens
- **DEMONSTRATES EFFICIENT USE OF RESOURCES AND SUPPORTS QUALITY RESULTS**
Highly valued by your institution's leadership

STOP HAVING TO CHECK—AND RE-CHECK SAMPLES
Have assurance. Only the highest quality is found here.
