

Third Party QC Integration

How long does it take you to react to a QC failure?

With Third Party QC Integration

Halt the cascade of errors in real-time with QC integration

Be confident

Real-time integration between QC and results production

Know now

Instant notifications via pop-up alerts – failed assay results held until issue is resolved

Save time

Faster recovery from QC errors; Integration with autoverification rules; Automated data entry

Stop errors
before they
leave the lab

Encounter
QC
error

Without Third Party QC Integration:

Manually identifying QC errors opens up your lab to human error and could result in:

Sample reruns

Patient redraws

Delayed results

Increased costs

Damaged reputation
