

eLabDoc 3: Next Generation Product Library on DiaLog

What has changed in eLabDoc 3

- Old catalog drill-down replaced by more powerful product search
- **Document search works basically unchanged – select «Documentation»**
- New look, moderate rearrangements of known interaction elements

Key Benefits

- Single source of information by integration of:
 technical-support.roche.com
 reagent-catalog.roche.com
- **Many usability enhancements**, including further improved display on tablet devices

How to set up preferences

- **Enter preferences through «my preferences» in the top left menu**
- The basic principles of preferences definition and push e-mail settings are unchanged
- More intuitive arrangement of some elements

How to find customer notifications

- Standard search for customer notification documents is unchanged
- **New: Direct access to notifications of the last 6 months** via carousel menu on eLabDoc homepage (see image)

How to find the latest document version

- Latest version filter facet is available as before
- **New: Version, and all other filters now allow for multi-select**

How to access system / assay specific documents

- Use Documentation search as before
- **New: in Catalog search, search by product name or keyword**, or use filters on the left to search by product segment
- On the product details page of a system or assay, find associated documents in «documentation» tab
